

IRCA Registered ISO 9001:2008 Auditor/ Lead Auditor Course

How to Carry Out Professional Management System Audits

Course Description

Professional audits require competent, well lead teams. This comprehensive course, run by registered lead auditor(s) provides practical training to acquire the skills to audit effectively. The course fully meets the training requirements for IRCA registration as an auditor and lead auditor.

Who Should Attend

The course is designed for quality professionals who are required to audit suppliers. It is also suitable for auditors carrying out internal audits. Others who will benefit from the course are people who manage quality or procurement within their organisations and who will gain from understanding the quality audit process.

Benefit to Your Business

The main benefits are:

- ✓ The capability to do effective audits of your supply chain and to make the correct purchasing decisions
- ✓ The knowledge that your management systems are being effectively audited

Course Structure

The course is structured around a series of practical build-up modules (see Fig 1) which cover:

- ISO 9001: 2008 and their application to a wide range of manufacturing and service organisations
- ISO 19011- the international guidance for auditing quality management systems
- Planning an audit including document review, preparation of checklists and audit plans
- Carrying out an audit using case study and role play techniques
- Analysing and reporting the audit findings, and rating them in order of significance
- Determining the effectiveness of corrective and preventive actions

We use the latest **accelerated learning** techniques throughout the course. These have been proved to considerably improve knowledge retention.
